👤 PROFILE

An Industrial Designer with strong UI/UX design skills, currently working in the field of product development. Experienced in bridging the gap between physical and digital experiences by applying human-centered design principles. Passionate about creating intuitive and visually engaging interfaces that enhance user interaction. Skilled in user research, wireframing, and high-fidelity prototyping, with a deep understanding of both form and function across disciplines.

📁 PROFESSIONAL EXPERIENCE

R&D Industrial Designer, Volta Motor Aug 2023 – Present

- Promoted from a design internship to a full-time role after successfully delivering a three-wheeled motorcycle project from concept to prototype.
- Leads UI/UX design initiatives for in-vehicle digital systems, including dashboards and control units, focusing on enhancing driver interaction and usability.
- Manages the end-to-end design lifecycle for key vehicle projects, translating user research and initial sketches (low-fidelity concepts) into high-fidelity 3D models and testable prototypes.
- Collaborates closely with the R&D department to ensure design concepts are both user-centric and technically feasible, effectively bridging the gap between user needs and engineering constraints.

Social Media Content Creator 2022 – 2025

- Designed visually engaging assets and interface elements for social media platforms to increase user engagement and brand visibility.
- Analyzed content performance and user feedback to iterate on and optimize design strategies.

🎓 EDUCATION

Marmara University | Industrial Design, Bachelor Degree Sep 2019 – Nov 2023

- Gained expertise in product development, user-focused design, and creative problem solving.
- Explored the balance between aesthetics, functionality, and technology in design processes.

Anadolu University | Web Design and Coding, Associate Degree 2021 – 2023

- Gained foundational knowledge in front-end principles including HTML, CSS, and the basics of JavaScript, enabling effective collaboration with development teams.

SKILLS

Design & Prototyping

Figma, Adobe XD, User Interface (UI) Design, Wireframing & Prototyping, Adobe Photoshop, Illustrator, Digital and Hand Sketching

UX Research & Process

User Research, Usability Principles, Persona Development, User Journey Mapping

3D & Other Tools

Rhinoceros 3D, Keyshot, Blender, Solidworks, Autocad, MS Office
